Neuro IPM Release Notes

Release Date: 08/29/2023

Version: 2.7.4

Included in the release:

New Development:

1. Addition of a progress bar
2. Updated step names
3. Addition of DataDog for frontend monitoring

Issues/Bug Fixes:

4. Tablet bug resolved related to available camera streams.

Details:

1. **Addition of a progress bar**

   A progress bar and step counter has been added to the user interface. Participants can now determine what step number they're on with a visual indication of progress.

2. **Updated Step names**

The step names have been updated to provide a better indication of the steps' purpose. The updated step names are as follows:

Step 1: **Welcome** (Introduction video)

Step 2: **Setup Requirements** (Hardware/Environmental Requirements)

Step 3: **Start Setup** (click the circle objects)

Step 4: **Finish Setup** (smooth yellow dot video)

Step 5: **Sample Video** (practice performance measure)

Step 6: **Preparing your child** (Your Child's Experience-informative video)

Step 7: **Your Child's Turn** (video preview/headbox)

Step 8: **Child Setup** (child's video with moving objects)

Step 9-Step 27: **Video Tasks** (includes SA, RV, PS, SWR, & VWM)

3. **Datadog implemented**

Datadog has been added for frontend monitoring. DataDog provides a user's device information, browser type, and allows for the playback of the user's screen capture. This all allows for better troubleshooting and error investigation.

4. **Bug Fix:**

An Android tablet bug was resolved related to the devices available camera streams.
