**Fix #1 Fix for Replacement Text for a DLS Objective**

Details:

1. Addressed a bug for a DLS objective - the replacement text in the code needed to be updated so the front end was able to find the area of text in the objective which needed to be replaceable

Fix #2 Fix for Email Field Label - Patient Record

Details:

1. Updated the label for the "parent/caregiver" field
2. This was updated to the following: "Parent/Caregiver Email Address"

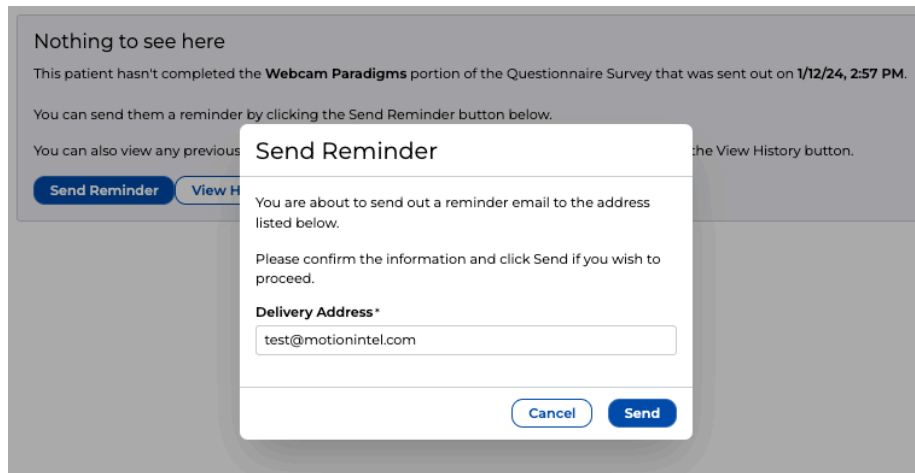

Fix #3 Adjust Patient Service Query

Details:

1. Updated the query in patient service to align "completed" and "completed_date"
2. This will address a bug where the date displayed in the "Assessment Status" column on the patient landing page was incorrect

Fix #4 Fix for Email Field Label - "Send Reminder" workflow

Details:

1. Updated the label for the email field in the "send reminder" workflow
2. This was updated to the following: "Delivery Address"

Fix #5 Fix for Sorting Questionnaires in Patient Portal

Details:

- Fixed a bug where the questionnaires were getting sorted incorrectly in the patient workflow if the page was refreshed
- This caused the user to be routed to the *landing page* and they were unable to re-enter the workflow to completed the remaining assessment(s)
